

## Decima (DCMA) – Whitepaper

### A Sovereign-Grade Cryptocurrency

*Issued by Decima Technologies Pvt. Ltd. | Backed by Real World Assets*

#### 1. Executive Summary

**Decima (DCMA)** is a sovereign-grade cryptocurrency launched on the BNB Smart Chain (BEP-20) network, registered with the Financial Intelligence Unit (FIU), Ministry of Revenue, Govt. of India. Designed for ultra-high-value digital transactions and asset tokenization, Decima is one of the world's first cryptocurrency launched initially with a **fixed price of \$110,000 USD per coin** and a **total supply of 21 million coins** - mirroring the scarcity model of Bitcoin but with institutional-grade backing, uniquely supported by a robust ecosystem of real-world businesses, infrastructure assets, and intellectual property.

The valuation is **strategically backed by future projected revenues and tangible asset portfolios** from multiple high-growth sectors - airports, airlines, fintech, healthcare, defense, artificial super intelligence, and infrastructure. The DCMA token is designed for high-value transactions, sovereign wealth storage, and enterprise-level blockchain tokenization applications.

Unlike other tokens and cryptocurrencies where the asset is backed by one primary source of liquidity which is demand vs supply, the DECIMA token [DCMA] on the other hand is provided with multi backing of **\$5 trillion USD (projected)** through **multi-project and product initiatives**, supported by Banco De Seychelles; a strategic financial technology and digital reserve asset firm along with our real-world assets.

With Decima, we aim to create a reliable, globally recognized, high-value digital currency for private, governmental, and institutional use cases backing our real-world projects.

These pillars support a total projected economic ecosystem value exceeding **\$2.31 trillion**, anchoring the fixed DCMA price of \$110,000 per coin.

### Value Proposition:

- **High-Value Wealth Transfers:** For investors and entities seeking stable, high-denomination cryptocurrency movement.
- **Private Holdings and Sovereign Reserves:** Ideal for long-term treasury reserves or digital sovereign wealth storage.
- **Blockchain-Based Asset Tokenization:** Acts as a base pair for tokenizing real estate, gold, or infrastructure projects.
- **Digital Financial Instruments:** Enables creation of structured digital assets backed by real-world reserves.

#### 4. Use Cases

- **Sovereign Digital Reserves:** Used by governments and institutions as a secure digital asset.
- **Asset Tokenization:** Base token for real estate, infrastructure, and gold-backed token offerings.
- **Private High-Value Transactions:** Ideal for billionaires, family offices, and private equity entities.
- **Structured Digital Products:** Underlying token for stablecoins, security tokens, and digital derivatives.
